

**OVERVIEW**

Bray’s Integral Sprocket Chainwheels are designed to replace traditional valve handwheels by mounting directly onto the gear operator’s input shaft. These chainwheels are ideal for safely and easily opening and closing valves that are installed overhead or in hard-to-reach locations.

All units come complete with sprocket chain wheel, chain guide, installation instructions, chain and safety cable kit.

**SPECIFICATIONS**

Chainwheel Size (in.)	Chain Type	Materials			Adapts to Bray S04 Gear Size
		Wheel and Guide	Chain		
			Standard	Optional	
9	Weldless	Ductile Iron	Galvanized steel	Stainless Steel	30:1
12.5	Weldless	Ductile Iron	Galvanized steel	Stainless Steel	30:1, 50:1
19	Weldless	Ductile Iron	Galvanized steel	Stainless Steel	80:1, 150:1
